

SPECIAL EVENTS

In pursuit of conservation, management, development and proper utilization of the Region's environment and natural resources, various ENR-related special events were conducted. These events served as platform to bring awareness and collaboration among stakeholders as well as incentive and motivation to employees to work even better.

Some of the special events conducted by the different implementing units include World Seagrass Day, Month of the Ocean, International Coastal Clean-Up Day, Coral Triangle Day, Zero Waste Month, Environment Month, Holiday for a Cause, ENR Statistical Quiz Contest and Arbor Day among others. These activities play an important role in the mobilization of citizenry as envisioned by the Department because large number of ENR advocates gathered together to participate in the various undertakings of the region. Their involvement was not seen as one time commitment considering that lectures and discussions were made prior the conduct of clean-up, tree planting, etc. Every implementing unit ensures that the importance of taking care the environment through active involvement in the conservation, rehabilitation and sound utilization of the natural resources is imbedded in the heart and mind of the ENR partners.

Moreover, another vehicle in the attainment of the mandate was the conduct of Multi-Stakeholder's Forum—Visayas Cluster on January 19-20, 2023 and consultation with the Civil Society Organizations (CSO) on February 27-March 2, 2023. The fora served as channel of a strengthened collaboration as an outcome of fruitful exchange of ideas and foresight for a sustainable environment.

Significantly, the management recognizes the efforts of the personnel through attendance to trainings and learning events and giving of awards every semester, while the region strives to institutionalize Quality Management System (QMS).

Physical Performance Award

On December 6-7, 2023, a small group discussion was conducted spearheaded by the ARD for Management Services as an offshoot of the conduct of QMS Monitoring and Technical Guidance Learning Activity with the Central Office Secretariat on November 9-10, 2023. Moreover, the review of the Risk/Opportunities Analysis and Action Plans (ROAAPs) was conducted for calibration based on the discussion with CO-QMS Secretariat.

Part of effective fiscal and financial management was the conduct of planning workshops, Full-Time Delivery Unit (FDU), management conferences, executive committee meetings and assessment of physical and financial accomplishments. These facilitate the spontaneity of target implementation easing out gaps in the operation through proper guidance and direction.

Mobilization of the general public to work for a sustainable natural resource management has been a colossal task putting the Region's leadership in a challenging state, but with the successful conduct of these ENR related activities that objective will be gradually attained.
